SEALMASTER USRB MOUNTED SPHERICAL ROLLER BEARINGS

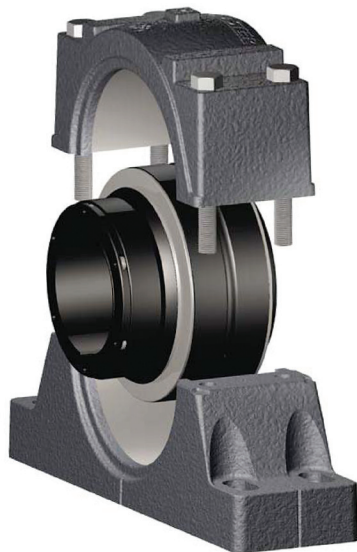

Emerson Industrial Automation is proud to announce a new line of Sealmaster® USRB Mounted Spherical Roller Bearings. Check out how the benefits can help to increase your operations' efficiencies and profitability.

The innovative new line of USRB is available with patented **felt lined rotating flinger seals**. *An Emerson exclusive!*

The seals are mounted between the races and allows up to **+/-2° misalignment which provides up to twice that of an SAF**. This combination dramatically cuts the potential for downtime and provides the kind of interchangeability, lower operating costs and reliability you need to keep your equipment and your business running 24/7.

Mounted Between the Races and Allows up to +/- 2° Misalignment

Cartridge Provides Fast Installation and Removal

The Sealmaster USRB offers a choice of two distinct locking systems:

1. Collar mount with bore sizes up to 7"
2. Advanced adapter mounting system* with bore sizes up to 8"

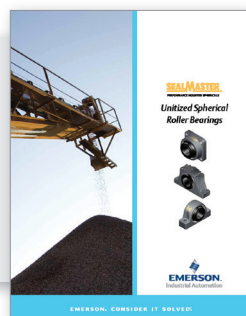

*This highly engineered and easy locking system requires less force and installs more quickly than competitive bearings.

Take a look at how easy installation and removal is by viewing our video at www.emerson-ept.com or visit us on You Tube at channel "ThePowerTransmission" URL: <http://www.youtube.com/watch?v=-NJ9k91NQ8c>

The new performance line of Sealmaster USRB Mounted Spherical Roller Bearing is an advanced design that combines traditional Sealmaster features and built in benefits with even more performance and values. USRB is designed to meet the challenges in demanding industries such as primary metals, mining, aggregate, forest products, recycling, pulp and paper, etc. in applications involving bulk material handling conveyors, feed systems, stacking, blending, etc.
